

## BLUE ENGINEERING

Design “turn-key” services to fields of excellence: automotive, railway, aerospace

**GRETA - Green Recyclable Electric Traction Automobile (2015)**

Concept car - Eco friendly vehicle with family and cargo configurations.

Key features: Max Speed: 80 Km/h -  
Range: 150 Km - Weight: 550 Kg -  
Power: 18 Kw

**ERGONOMICS and VERSATILITY**

## CARROZZERIA TOURING SUPERLEGGERA

All-round supplier of automotive design, engineering and body manufacturing.  
Custom built automotive bodywork

### MINI SUPERLEGGERA VISION (2014)

Elaborately crafted, unique concept car to explore new design languages for the iconic British brand.

It adds the Italian design touch to MINI's British essence, while continuing the tradition of classic coachwork construction.

**SPORTING ELEGANCE and LIGHTNESS**

## FOCACCIA GROUP

Design and manufacturing of automotive components, accessible vehicles conversions, police cars and special vehicles conversions

### SMART FORFOOD (2016)

Smart Forfood: the first four-wheeled starred restaurant, born from the creative genius of the chef Davide Oldani. A first, innovative original union between the world of automotive and the world of taste.

**DESIGN, COMFORT & SAFETY  
OF CONVERSION PROJECTS**

## MANCINI GROUP

Specialized in design, project development and realization of prototypes in the automotive sector.

### FV - FRANGIVENTO ASFANÈ' CHARLOTTE (2017)

FV-Frangivento is an autonomous brand which takes advantage of 15 technical partners. Mancini Group is one of them.

FV-Charlotte is the roadster version of the concept car Asfanè. It is a **hypercar** of the future, the first Italian full electric roadster built in Italy with the highest quality craftsmanship united to the new technologies.

**FUTURISTIC DESIGN &  
HERITAGE OF ITALIAN BODY  
WORK**

## PICCHIO

It designs, manufactures, develops and homologates special cars (heat-engine, electric, hybrid), one-off or in very limited series.

### FAST & GO (2015-2016)

Integrated system for the electric car sharing, free flow, battery swap. It takes less than 2 minutes to change the battery.

City electric car with battery swap

Automated battery swap station

Management interface car-station software of battery swap

Car sharing free flow services management software

**INNOVATION FOR  
SMART CITIES**

## PININFARINA

Focused on design, engineering services, conception and manufacturing of products that impact our lives as they interplay with technology

### H600 (2017)

Eco-sustainable new energy concept car. A luxury sedan styled by Pininfarina for Hybrid Kinetic Group.

It displays a formal balance between elegance and up-to-the-minute aesthetics.

The next-gen HK powertrain technology, comprising battery, electric motors, electrical controller and range extender, is the other key feature.

**ECO-SUSTAINABILITY and EXCLUSIVITY**

## CECOMP

Providing turnkey projects, from the development to the production of complete vehicles in small series.

### VULCANO (2016)

One-off creation handmade, a world first with its unique titanium and carbon fiber body.

The naked titanium body is a sculpture (10,000 hours of hand-crafted work). The Vulcano's strongly sculpted body side and voluptuous shapes evacuate the hot air from the engine and reduce air turbulence generated by the wheels.

**HANDCRAFT &  
NEW MATERIALS  
PREMIUM PRODUCTION**
