Press release

## THE EUROPEAN CAR MARKET GREW BY 18.7\% IN JUNE, ONCE AGAIN ACHIEVING DOUBLE-DIGIT GROWTH AND CLOSING THE FIRST HALF OF THE YEAR AT 17.6\%

Since the beginning of 2023, registrations have been $21.8 \%$ lower than H1 2019, still far from pre-pandemic sales volumes. In June, sales of rechargeable cars (BEVs and PHEVs) in the five major markets reached 183,664 units, up $35.6 \%$ and representing a share of $20.7 \%$. In Italy, registrations of electric vehicles rose by $4.3 \%$ in the month, reaching a share of $9.8 \%$. In June, battery-electric vehicles surpassed diesel cars (11.8\%) for the first time in the EU-EFTA-UK area

Turin, 19 July 2023 - According to figures published today by ACEA, passenger car registrations in the enlarged European Union, including EFTA and the United Kingdom, ${ }^{1}$ totalled 1,265,678 units in June, 18.7\% more than in June 2022.

In the first half of 2023, registrations reached $6,588,937$ units, a positive change of $17.6 \%$ compared to last year.
"The European car market witnessed a double-digit increase of $18.7 \%$ in June 2023 - says Roberto Vavassori, President of ANFIA. This was due to the comparison with the sharp decline in June 2022, when the market experienced a decline of $16.8 \%$ due to difficulties in sourcing raw materials and components. However, the overall registrations since the beginning of 2023 are still $21.8 \%$ lower than the sales volumes of the first half of 2019.
Despite Hungary's fall of $1.4 \%$, all European markets, including the five major markets, witnessed a rise in June 2023. The UK saw a rise of $25.8 \%$, Germany saw a rise of $24.8 \%$, Spain saw a rise of $13.3 \%$, France saw a rise of $11.5 \%$, and Italy saw a rise of $9.1 \%$.
The first half of 2023 closed at a positive $17.6 \%$, with over 6.5 million registrations. However, the overall sales volumes are still far from pre-pandemic levels and $21.8 \%$ lower than the sales volumes of the first half of 2019, which closed above 8.4 million units".

In the EU+EFTA+UK region, the number of alternative fuel cars registered an increase of $34.5 \%$ in June. Among these cars, Battery Electric Vehicles (BEVs) had the most robust growth, with a $55.3 \%$ increase and a $16.5 \%$ market share. This is up from $12.6 \%$ in June 2022. Conventional hybrids also showed strong growth, with a $33.4 \%$ increase and a $25.2 \%$ market share. In June, for the first time, the share of BEV cars exceeded that of diesel cars, accounting for $11.8 \%$ of the market. In total, 626,841 hybrid and electric cars were registered, representing 49.5\% of the market. Rechargeable cars (BEVs and PHEVs)

[^0][^1]achieved a $24.4 \%$ share, with 308,474 units registered. In the five major markets, sales of rechargeable cars totalled 183,664 units in June, up $35.6 \%$ and with a share of $20.7 \%$. In the first half of 2023, rechargeable cars numbered 826,791 , up $18.9 \%$, with a penetration share of $18 \%$ in the same area.

In June 2023, the sales volume in Italy was 138,901, an increase of 9.1\%. During the first six months of 2023, total registrations added up to 840,750 units, representing a growth of $22.8 \%$ compared to sales volumes for the same period in 2022.

According to ISTAT data, in June, the national consumer price index remained unchanged on a monthly basis and increased by $6.4 \%$ on an annual basis. This is a deceleration in the inflation rate compared to the previous month's figure of 7.6\%. The deceleration was due to the slowdown in the prices of non-regulated energy goods (from $+20.3 \%$ to $+8.4 \%$ ) and, to a lesser extent, of processed food, transport-related services (from $+5.6 \%$ to $+3.8 \%$ ), and the more marked fall in regulated energy goods (from $-28.5 \%$ to -29\%). In terms of non-regulated energies, the prices of city gas, natural gas, and electricity on the free market decelerated, along with the prices of petrol and diesel for transport; petrol decreased by $9.6 \%$, and diesel fell by $14.4 \%$. Additionally, the prices for Other solid fuels decreased by $15.9 \%$, heating oil prices fell by $21.5 \%$, and Other fuels fell by $10.2 \%$.

In June, petrol passenger cars increased by $6.7 \%$, holding a market share of $28.7 \%$, while diesel passenger cars declined by $2.6 \%$ compared to June 2022, holding a share of $18.3 \%$. Over the six months, petrol car registrations increased by $23.9 \%$ (holding a $28.1 \%$ share), and diesel car registrations rose by $16.9 \%$ (holding a $19.1 \%$ share over the period). Registrations of alternative fuel cars represented $53 \%$ of the market in June alone, with sales volume increasing by $15.4 \%$ compared to the same month in 2022. In the same period, alternative fuels grew by $24.6 \%$, representing a market share of $52.7 \%$, an increase of 2.6 percentage points compared to the same period in 2022. Electrified cars comprised 43.2\% of the market in June, with sales volume growing by $23.1 \%$ and $28.5 \%$ in the year. Among these, mild and full hybrids increased by $29.9 \%$ in the month, holding a market share of $34.6 \%$. In the cumulated year, they grew by $30.3 \%$, having a share of $35.2 \%$. Registrations of rechargeable cars increased by $4.3 \%$ in the month, holding a market share of $9.8 \%$, and by $17.2 \%$ in the cumulated year, having a share of $8.5 \%$. In detail, electric cars held a share of $4.4 \%$ and increased by $0.1 \%$ in the month, while plug-in hybrids grew by $8 \%$ and had a $5.3 \%$ market share in June. Both fuel types rose in the cumulated year, increasing by $31 \%$ and $7.6 \%$, respectively. Lastly, gas-powered cars represented $8.6 \%$ of the registered vehicles in June, of which $8.5 \%$ were LPG cars (-4.7\% compared to June 2022) and $1 \%$ were natural gas cars ( $-91.5 \%$ ). Over the six months, LPG cars increased by $24.4 \%$, while CNG cars fell by 86.4\%.

In June 2023, the Spanish automotive industry registered 101,085 vehicle sales, a 13.3\% increase from the same month last year. However, from January to June 2023, the
market grew by $24 \%$, with 505,421 units registered. It's worth noting that this figure is still $27 \%$ lower than in the same period in 2019.
ANFAC, the Spanish automotive association, has stated that June 2023 was a positive month for the market, with over 100,000 units sold, showing double-digit growth compared to June 2022. The tourist season is in full swing, leading to a surge in purchases from rental companies. This is partly due to the stabilisation of the supply chain for components and semiconductors. ANFAC predicts that the Spanish market will end the year with approximately 950,000 units sold. However, reaching one million units will depend on sustaining demand in the last four months of 2023 and the effects of interest rates above 4\% on consumers' purchasing decisions.
Sales to private individuals recorded an $8.5 \%$ growth compared to June 2022. In terms of sales channels, new registrations in the name of companies increased by $1.9 \%$, while the rental channel posted an impressive $48.8 \%$ growth.
In June 2023, petrol cars accounted for $43.3 \%$ of the market, followed by non-rechargeable hybrid cars, which accounted for $30.1 \%$. Diesel cars represented $12.2 \%$ of the market, with sales volumes down by $21.7 \%$ compared to June 2022. Plug-in hybrids represented $6.4 \%$ of the market, with sales volumes up by $51.7 \%$ compared to June 2022. Meanwhile, electric cars accounted for $5.4 \%$ of the market, with sales volumes up by $73.6 \%$ compared to June 2022. Gas cars represented $2.6 \%$ of the market share.

Finally, the average $\mathrm{CO}_{2}$ emissions in June 2023 stood at $117.1 \mathrm{~g} / \mathrm{km}, 3.7 \%$ lower than in June 2022.

There were 190,847 new car registrations in France in June 2023, an $11.5 \%$ increase from June 2022. In the first half of 2023, there has been a $15.3 \%$ increase, with a total of 889,776 registrations compared to the same period in 2022.
Compared to last year, cars using diesel ( $-9.3 \%$ ) and gas fuel decreased in June. On the other hand, all different types of fuel are increasing. The market share of electric cars was $17.5 \%$ for the month, up from $12.8 \%$ last year.

According to the German Automotive Association VDA, in June 2023, 280,139 units were registered in the German market, which is a $24.8 \%$ increase. However, despite this significant rise, overall sales volumes remain low.
Registrations for the first half of 2023 stood at $1,396,870$ units, which is a $12.8 \%$ increase compared to the same period in 2022.
In June 2023, domestic orders continued to decline, with a trend decline of $20 \%$. The contraction for the period January-June 2023 was $27 \%$.
Regarding the type of fuel, hybrid cars, including plug-in hybrids, represent $22.2 \%$ of the market, with a $59.1 \%$ increase. Electric cars, on the other hand, represent $18.9 \%$ of the
market, with a notable $64.4 \%$ increase. LPG cars represented $0.8 \%$, while natural gas cars represented only $0.1 \%$ for June.
Finally, the average $\mathrm{CO}_{2}$ emissions of newly registered cars increased by $2.3 \%$ to 115.1 g/km in June 2023.

According to recent data, the UK market registered 177,266 new passenger cars in June, a $25.8 \%$ increase from last year. This marks the eleventh consecutive month of growth, partially due to the resolution of the supply crisis.

During the first six months of this year, registrations reached 949,720 units, indicating an 18.4\% increase from the first half of 2022.

The Society of Motor Manufacturers and Traders (SMMT) reveals that the new car market is recovering and is increasingly focused on electric vehicles. However, the energy transition needs to accelerate to meet the climate targets. Most electric vehicle owners appreciate the convenience and savings of charging at home. However, for those without a home charging point, taxes for the same amount of energy are four times higher. This situation risks delaying the spread of e-mobility. To address this, there is a need for a reduction of VAT on public charging stations as soon as possible.
In June, fleet registrations increased by $38.4 \%$, private car registrations by $14.8 \%$, and company car registrations by $12.7 \%$.

Electric vehicle sales remained strong, with a 39.4\% increase and a market share of 17.9\%. Plug-in hybrids (PHEVs) also increased by $65.5 \%$, with a $7.2 \%$ market share, $5.5 \%$ higher than last year. On the other hand, diesel car sales continue to decline, with a $22.3 \%$ decrease in June and a share of only 3.5\%. Petrol car sales rose by $13.5 \%$, accounting for a $39.7 \%$ share.

ANFIA - Italian Association of the Automotive Industry
Born in March 1912, over these one hundred years, ANFIA mission has always been to represent the interests of its associate members and ensure effective communication between the Italian motor vehicle industries on the one hand, and the Public Administration and Italian political bodies on the other, with regard to all technical, economic, fiscal, legal, statistical and quality-related issues referred to the automotive sector. The Association is structured in three product-based Groups, each one chaired by a President. Components: motor vehicle parts and components manufacturers; Car Coachbuilders and Designers: companies working in the sector of design, engineering and style of motor vehicles and/or parts and components for the automotive sector; Motor vehicles: motor vehicles manufacturers in general, including trucks, trailers, camper vans, special means of transport.
